**COMMENTS:**

This unit must always be used with 2 inch thick, high density crash mats on all entrances and exits at a minimum of 1.2m from the unit. DO NOT operate in wind speeds in excess of 24mph/38kph. This unit must always be supervised by a competent adult who is capable of exercising authority over the users. I certify that the above equipment has been inspected to standards as indicated and complies with the current health and safety notes on inflatable play. BSEN14960 has been adopted where appropriate on the above inspection report. If the above equipment is an inflatable used for part of a game, I deem this item fit for purpose. All anchor points must be used to secure the unit to the ground at all times.
